Runway Incursion Training Materials for CFIs

Notice Number: NOTC6435

Runway Incursions are still a major threat in our aviation system. General Aviation pilots are the leaders in making these incursions.

We encourage all CFIs to spend a little extra time reinforcing Runway Incursion mitigation strategies with their students/clients. We have included a link (below) to the *Runway Incursion Baseline Remedial Training Lesson Plan*. This document was created for trainers assigned to do remedial training with pilots after an incursion. But, you can use it to provide pilots the training they need to avoid a Runway Incursion. Let's all be proactive and reduce Runway Incursions...
